

TACTICAL MAP FOLDING

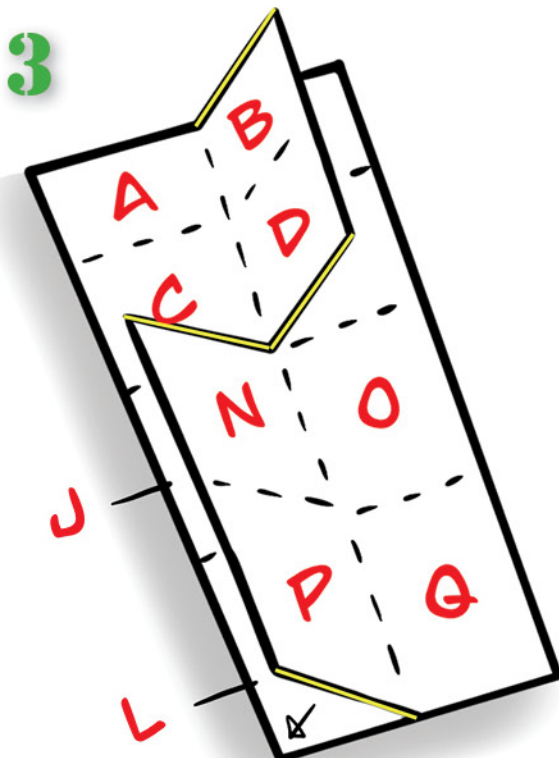

Flatten map and iron out any creases, trim off any excess margins to make it square.

Fold map and crease map into quarters both horizontally and vertically.

With a sharp blade, slice a horizontal line as shown in blue

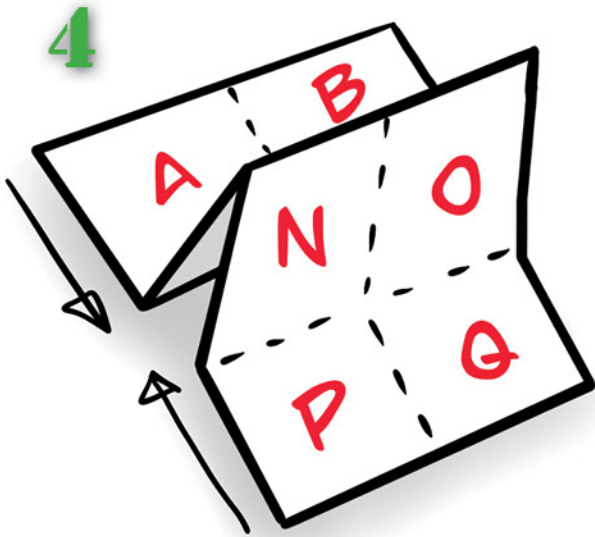

Push together from the outer edges to form a pyramid shape (diagram 2) and flatten the vertical middle section together.

Add Sellotape to close the edges at the bottom of D & P and at the top of N & B. Fold the Sellotape over to 'seal' the open edges.

Fold top and bottom flaps to the left and right as shown in diagram 3.

TACTICAL MAP FOLDING

Push together from the top and bottom as shown and apply Sellotape to the open edges.

After folding and applying Sellotape to the open edges, the map should now be compact.

You should now be able to flip the pages from left to right and up and down without opening the map sheet.
